Wall Grout is a fine powder grout specially formulated using carefully selected cements and additives to give a smooth, creamy, controlled workability for grouting wall tiles. Wall Grout is suitable for grouting joint widths up to 4mm wide. When set it is resistant to water and mould growth. Wall Grout is ideal for use in areas subject to prolonged wet conditions such as domestic & commercial showers, bathrooms and kitchens. Wall Grout is suitable for use internally and externally and is unaffected by frost after setting.

\* *When mixed with Flexmaster additive, the properties of Wall Grout are enhanced making it suitable for a wider range of application areas and substrates.*
