

FLOOR LEVELLERS

Leveller

Self Levelling Floor Compound

- Apply up to 6mm in one coat
- Light Foot traffic after 3 hours
- Fast Setting, cover after 8 hours
- Simply mix with water
- Protein free

Leveller is a fast setting, cement based formulation for smoothing rough and uneven floors in preparation for laying a new floor covering. Leveller provides an ideal base for many floor coverings. Leveller is easily spread and can be applied up to depth of 6mm in one application, when mixed with 3mm – 5mm aggregate, Leveller can be applied up to a depth of 15mm. Used as instructed, Leveller will start to cure after 90 minutes and is ready to receive light foot traffic after 3 hours.

Suitable for application to:

- Sand/cement screed
- Concrete
- Power floated concrete
- Tilebacker Boards

Water Addition:	4.7 – 5 litres of water to 20kg Leveller
Coverage:	Mixed with 5 litres of water, 20kg will cover 12m ² at a depth of 1 – 1.5mm
Working Time:	Use within 20 minutes of mixing
Drying Time:	Light foot traffic after 3 hours. Cover after 8 hours
Application Temperature:	+5°C to +30°C
Pack Sizes:	20kg
Colour:	Grey
